

EAP

Electronics Acupuncture Probe Set

The ultimate automotive electronics piercing and backpinning probe!

EAPs are designed for automotive electronic systems testing in which minimal impact back probing and wire piercing is mandatory

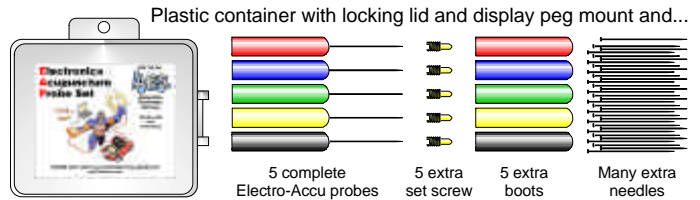

Low profile and very sharp, the EAP is ideal for back pinning of high-density connectors and mandatory for piercing small diameter wire. The EAP connects directly to your banana plug test lead eliminating the need for an intermediate alligator clip.

Most importantly, the EAP is field serviceable. When the pin bends or becomes dull replace it! The kit includes all the parts you need to replace the insulator, pin and setscrew.

Product Facts

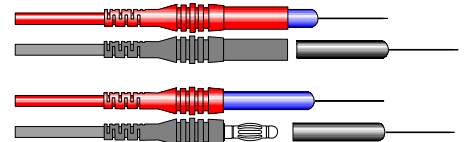

- Needle sharp probe
- Completely field serviceable
- Connects directly to banana plug test lead
- Can be modified to accept larger needles
- Utilizes standard straight pins
- Body nickel plated brass
- Insulator dip molded plastic, field replaceable
- Needle #17 straight pin either steal, stainless, or nickel plated brass

KIT CONTENTS:

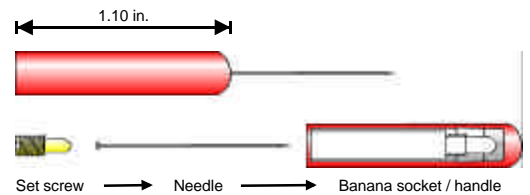

CONNECTION:

Connects directly to banana plug test lead with or without safety sheath

OVERVIEW:

- Straight pin
- Socket
- Insulator boot
- Set screw
