Porsche KTS 520

Instruction

PORSCHE PIWIS BASED ON KTS 520 KTS 550 PC VERSION Features

1. Simple adaptation to laptop or PC IBM T30 through USB or serial standard interface
2. Powered by ESI(tronic): ideal in combination with the workshop software for fast and targeted vehicle diagnosis in the workshop.
3. Full range of ESI(tronic) test specification immediately available.
4. Both models are equipped for all current diagnosis protocols:
   - ISO systems of European vehicles
   - SAE systems for American and Japanese vehicles
   - CAN protocols for testing state-of-the-art CAB bus systems in new vehicles
5. Direct multiplexer connection via OBD line to the diagnosis socket;
6. Software automatically controls multiplexer - thus dispensing with need for troublesome changing around of communication connections.

Package including:
Geniune KTS520 with 12months waranty from BOSCH
OBD2 BOSCH cable
USB cable
HDD software PIWIS work with IBM T30(optional)
