

# AD-1 Auto Scanner

The new generation WIRELESS AD-1 is a professional diagnostic scan tool that adopts the latest internet and computer technologies to create a uniquely flexible tool with an open architecture platform. It provides dealer level diagnostic power with an affordable price by using the owners existing laptop or PC. It is powerful, affordable, expandable and very flexible.

## Characters

1. Universal: The system works for European, Domestic, Asian, Korean, Japanese, Malaysian and Chinese vehicles.
2. Wireless: A range of 50 meters/yards means no more tangled cables.
3. Remote capable: Utilizing the latest PC Anywhere technologies, remote diagnostics is possible for the first time with the AD-1. One expert can support multiple locations virtually anywhere in the world.
4. Durable: Can be used in hot or cold weather, from -20°C to 50°C (-4 to 120°F).
5. Platform: Operates on either XP or Vista operating systems.
6. Interface: USB "plug-and-play" technology and high baud transceiver for faster data transfer.
7. Report: Results can be saved and printed for later reference.
8. Upgrading: Software can be upgraded anywhere via internet. New functions and features are added constantly to cover more vehicle models.
9. Hardware: Anti-shock rubber guards for stronger, more durable usage.
10. Flexible: Able to communicate with engine, transmission, airbag, anti-lock brake, anti-theft and body control modules in most vehicles.
11. Control functions: Binary communication allows component activation for testing.
12. Multilingual language support.
