

2000 A AC/DC Current Clamp (PP253)

The PP253 current clamp is suitable for measuring currents of up to 2000 amps DC or 1500 amps AC.

Note: the PP253 current clamp is supplied with shrouded 4 mm (banana) plug type connectors so can not be plugged directly into a PicoScope oscilloscope. We recommend the use of the TA000 or TA020 automotive test lead to connect the current clamp to the oscilloscope. Alternatively the MI078 BNC to 4 mm plug adaptor can be used.
