

Pressure Transducer Kit (P/N PTR1000)

- A Pressure Transducer kit that has the resolution and accuracy to read -30hg to 5000psi.
- Turns your scope or meter into an advanced diagnostic system.
- Quickly finds misfiring cylinders, running compression problems, camshaft timing problems, blown head gasket, sticking piston rings, fuel pressure problems, and much more.
- Can be used in conjunction with all ATS diagnostic equipment.
- The diagnostic tool for the new millennium technician.

Pressure Transducer Kit for EScope Limited and EScope Pro (P/N PTR1001)

- Same pressure transducer kit as PTR1000 excluding the battery power adapter (The EScope Limited and EScope Pro can both directly power up to four transducers at a time).
- Contains three extra pressure transducer connection cables to allow up to four transducers to be connected at once.

Kits Include:

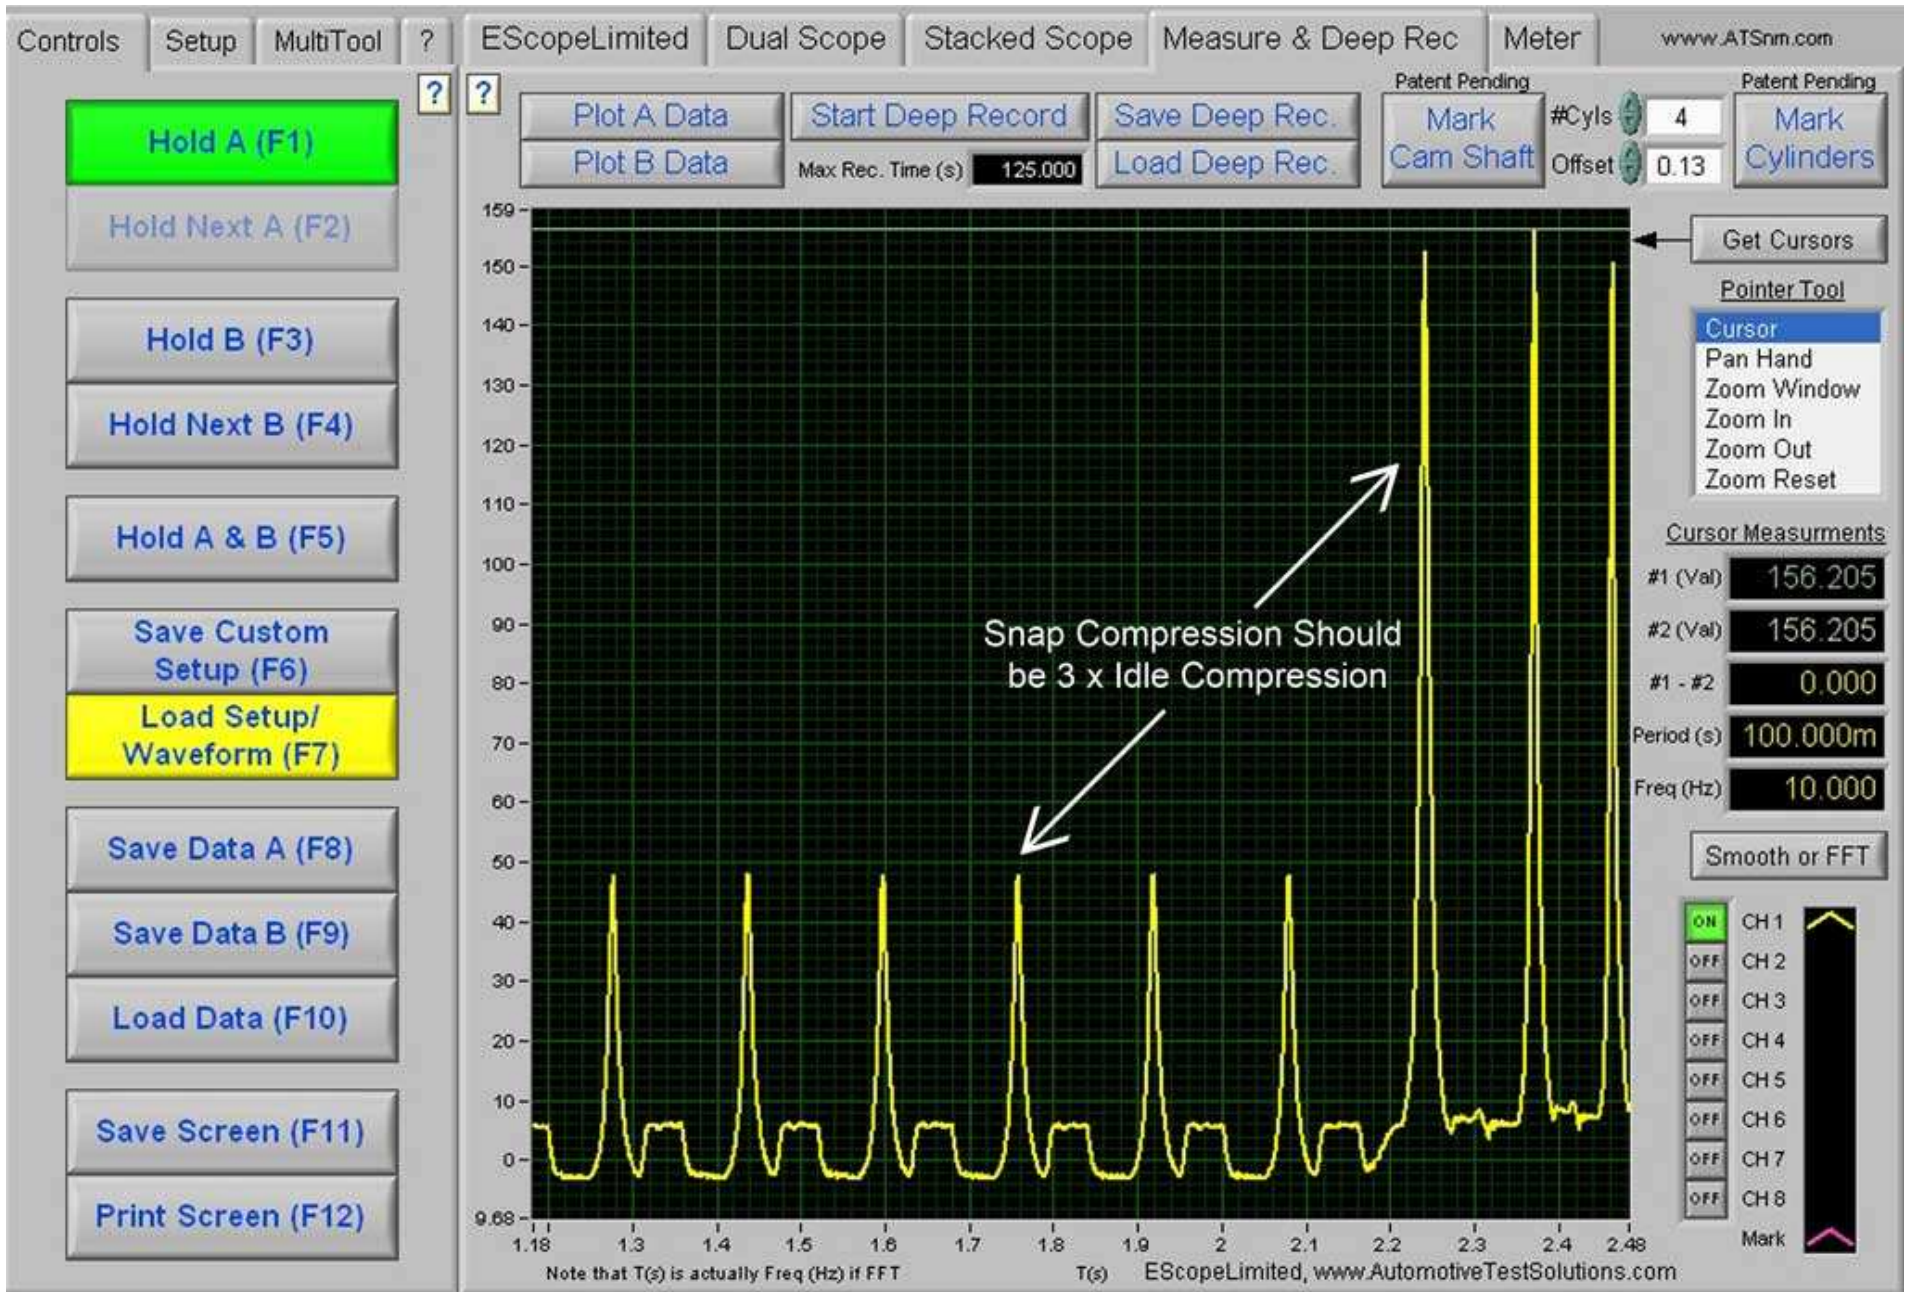

- Large Fuel Pressure Adapter
 - Small Fuel Pressure Adapter
 - Phono Jack to Phone Jack Cable
 - BNC to BNC Adapter Cable (PTR 1000 Only)
 - Phono Jack to Transducer Adapter Cable
(1 Cable for PTR 1000, 3 Cables for PTR 1001)
 - Exhaust Tail Pipe Hose
 - Inductive Pickup w / BNC Connection
 - High Pressure Adapter
 - 14mm Compression Tester Adapter
 - 18mm Compression Tester Adapter
 - Pressure Transducer Interface (PTR 1000 Only)
 - Emisfire Exhaust Sensor
- -30hg Transducer
 - 300psi Transducer
 - 500psi Transducer
 - 5000psi Transducer
 - 3/8" Hose Adapter
 - 1/4" Hose Adapter
 - Compression Fitting Coupler
 - Compression Hose Adapter
 - Large O ring Adapter
 - Small O ring Adapter
 - PTR Manual

EMissfire Amplifier (EMI1010) (Patent Pending)

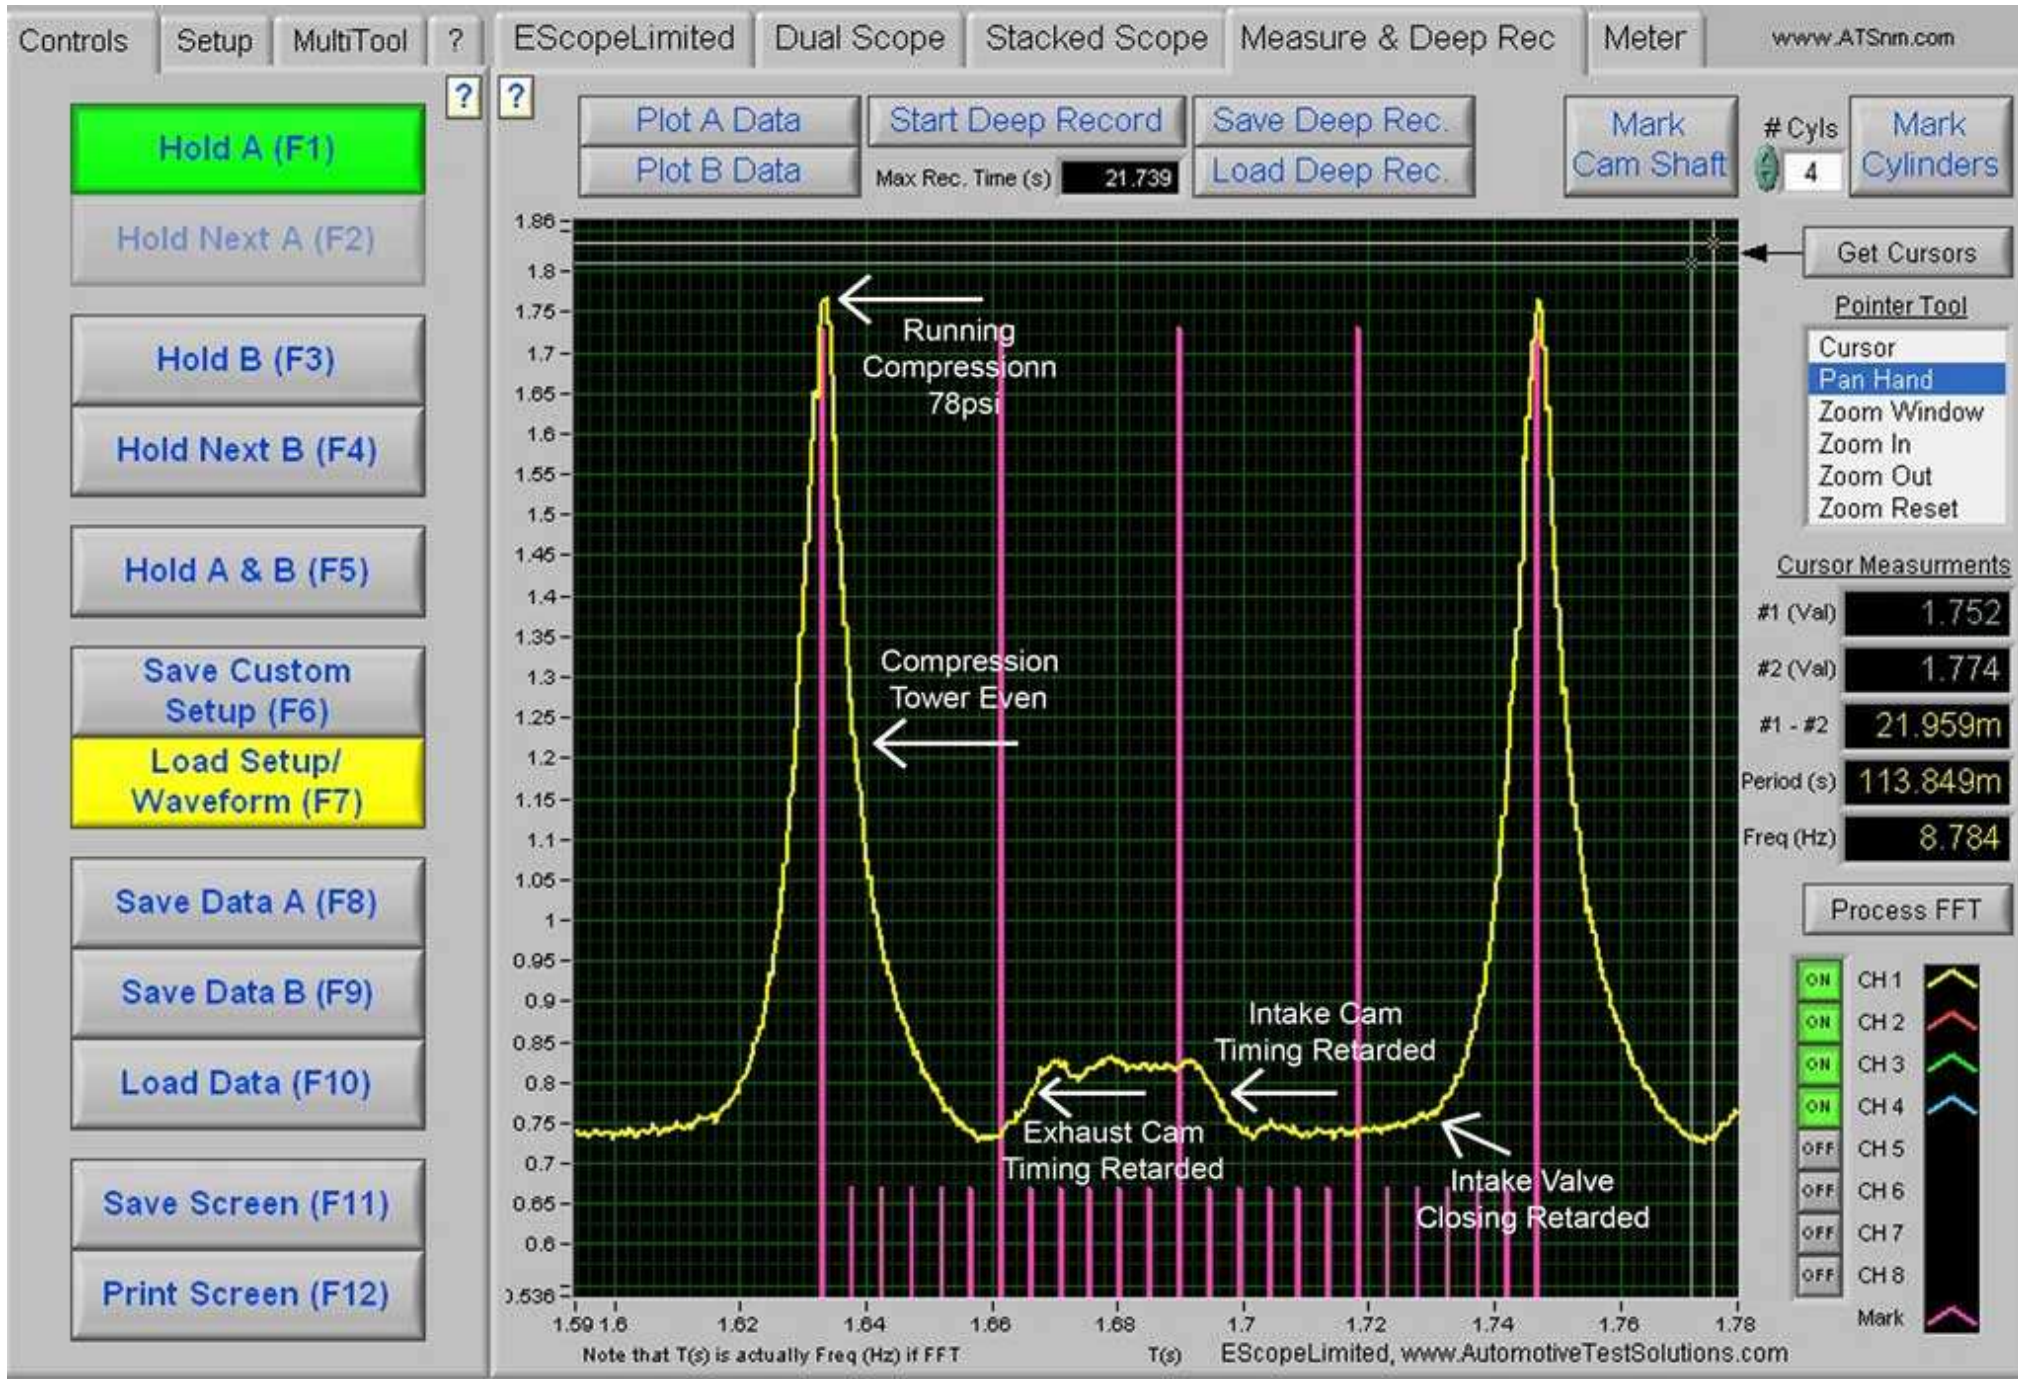

The ATS EMissfire Amplifier will amplify exhaust pulses to indicate that a misfire has occurred on an internal combustion engine. This amplifier makes the exhaust pulse waveform more usable during diagnosis of exhaust misfires.

Designed to be used with the ATS Emissfire Exhaust Sensor (part of the Pressure Transducer kit).

Snap Throttle Pressure

Camshaft Timing Retarded
